**PLANT MANAGEMENT  
CO-OWNER/VICE PRESIDENT**

***Process Reengineering \* Quality Assurance \* Team Leadership***

Dedicated in diverse experience in developing, implementing and leading operations and production in manufacturing environments. Established record in evaluating, scheduling and maintaining continual production improvement to decrease expenditures while increasing quality and yield. Efficiently executed quality control, and positively enforced occupational safety codes and programs throughout the operational environment. Exceptional leadership and communicative skills resulting in a motivated- unified workforce concentrating on annual team goals in production and safety. Co-owner and developer of TDK MACHINE, INC. with responsibilities concentrating in employee management, including hiring, training, and supervising; research and development of engineered physical components specific to and relevant within the oilfield industry including technological programming of CNC machinery.

»***Specialization in:***

- Lean Manufacturing
- Total Quality Management
- Policy and Procedure Development
- Team Building and Training
- Computer Aided Design to technically draw and design products
- Computer Aided Manufacturing/prototyping product components
- Coded Design and Revision Enhancement of data programs uploaded from PC-based systems to the mainframe of a computer numerical controlled machine

**PROFESSIONAL EXPERIENCE**

»**Co-Owner/Vice President/Plant Manager**

**TDK MACHINE, INC.**, Alice, Texas 78332, 11/2006-Present

Established and maintained a working clientele by providing quality and professionally manufactured components specific to the client's needs. Supervised a manufacturing process to generate an annual profitable gain while effectively maintaining a strict quality controlled safe working environment. Created and implemented engineering processes, from

conceptual design and layout to the production of machined parts via CAD/CAM technical programming.

- Identified and transitioned work to outsourced vendor
- Maintained profitable production levels through implementation of effective operational processes

---

» **Foreman**

Alice, Texas 78332, 07/1989-10/2006

Supervised 60 employees on 2 separate operational shifts. Designed and produced fixtures for machining processes. Managed Shop Floor Applications by implementing effective scheduling of lathes and mills, executing strict Quality Control programs, and executing Shop Floor Control software. Actively interfaced with vendors and business management for expedited ordering, shipping and receiving, volume planning, and material control forecasts. Provided quality training in the varied education and operations of CNC machinery. Thoroughly trained and knowledgeable in the maintenance, repairing and programming of CNC machinery through executing "G-code" instruction and fabrication of components by the selective removal of material.

- Improvement Process-Effectively created and set up fixtures for the automation of manufacturing processes through CNC machining resulting in improvements in consistency and quality of components
- Lean Manufacturing-Optimized fabrication through the minimization of waste and implementation of optimal production flow, load leveling and visual control.

---

» **Machinist**

Victoria, Texas 77901 9/1984-10/1989

Operator of manual lathes and manual knee mills. Maintained conformance to specifications resulting in profitable and quality production. Verified and adhered to all design revisions. Part of a team that transferred to new location in order to launch a new machine shop. Constructed the foundation, assimilated all electrical and air line layouts, determined optimal machine placement and configured accurate machine leveling. Established and maintained a profitable clientele base in the oilfield industry by providing specific manufactured components that satisfactorily met their needs.

• **SPECIALIZED TRAINING** •

- ❖ Certified:  
BobCAD-CAM Operator Certification  
Houston, Texas, 03/2008
  - ❖ Certified:  
Hands-On Hydraulic and Troubleshooting Womak  
San Antonio, Texas, 03/2005
-

- ❖ Certified:  
Lean Manufacturing UTSA  
San Antonio, Texas, 12/2004
  - ❖ Education:  
Vocational Machine Shop VHS  
Victoria, Texas, 1981/82
